Janet Orega

github: jantastication | LinkedIn: Janet Orega | www.janetorega.com

Full stack web developer with a passion for frontend development and a background in project management. Desire to build next-generation applications that provide custom solutions, connect humans and challenge my creativity. Skilled in portfolio and relationship management and executing project lifecycles. Superior data analytical skills and interpersonal communication.

TECHNICAL PROJECTS

My Flix - Github Server, Github Client | Demo
A movie cataloging app that lets a user collect, save or rate their favorite movies and provides detailed information on all movies
• Developed with a Rails API backend with PostgreSQL endpoints for users, movies and ratings.
• Implemented user interface employing React and Redux with Material UI + React Bootstrap for styling
• Utilized JSON web tokens and localStorage to store encrypted user information on client-side
• Customized routes in Rails API to serve specific information to the frontend

Stock City - Github Server , Github Client | Demo
Stock trading app where users can view current stock prices, purchase or add shares to their portfolio and track losses or gains
• Built using Ruby on rails on the server side, React.js client side and Semantic React for styling the user interface
• Developed a Rails API backend with MySQL database and endpoints for users and transactions
• Utilized IEX Trading API to pull and parse data on current stock exchange prices

Plan It - Github Server, Github Client |Demo
An event planning app that lets users find resources or provide services for events. Users can register as vendors or customers
• App has two interfaces, built using vanilla JavaScript, Bootstrap for styling and Ruby on Rails for the server side
• Developed a Rails API backend with MySQL database and endpoints for customers, vendors and quotes
